Production-Grade Conversational RAG

Why Toy Tutorial RAG Fails in Production & How We Built a Hallucination-Resistant System

The 4 Pillars of Production Architecture

1. FastEmbed ONNX (70% Less RAM)

2. Ephemeral ChromaDB (Zero-Disk Multi-Tenant Isolation)

3. Two-Layer Refusal Gate (<25ms Refusal, 0 Token Waste)

4. Physical 1-Indexed Citations (Zero Hallucination)

Measured Empirical Benchmarks

10/10 (100%)
Benchmark Accuracy

Perfect accuracy across extensive testing to secrerait accuracg.

<25ms Refusal Speed
(0 Tokens Wasted)

423.2 MB Peak RAM
(70% Memory Reduction)

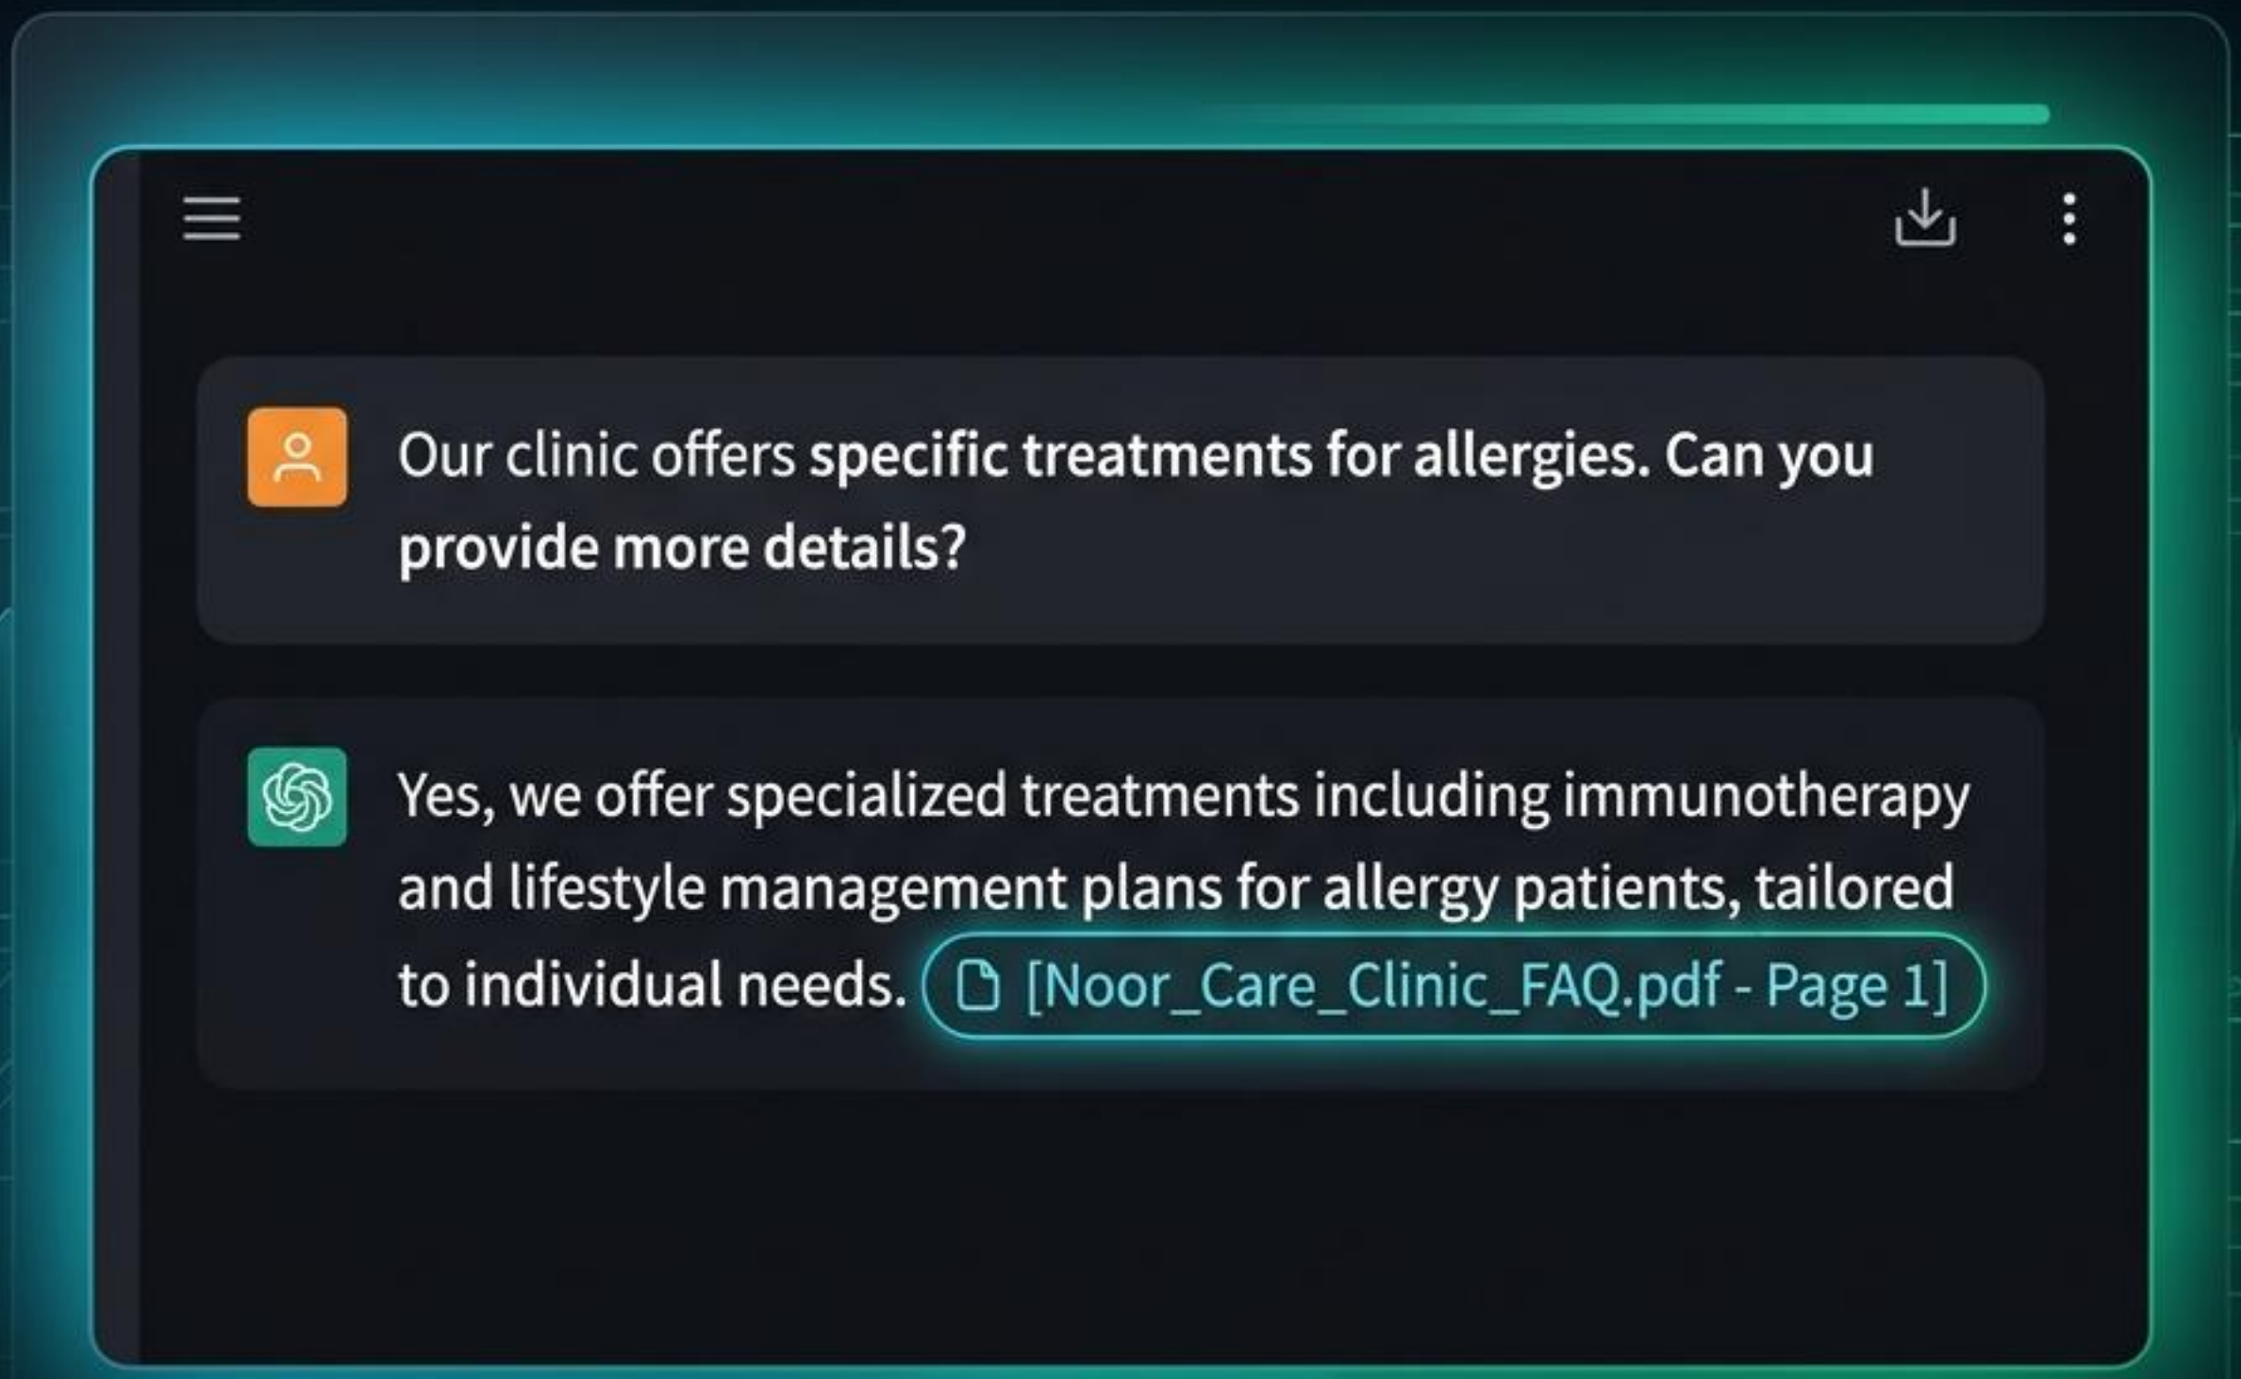

2.22s Cold Start
(82% Faster)

Live Interface & Verified Citations
